KMOU Division of Marine System Engineering

Introduction to Internal Combustion Engine

국립 한국해양대학교
NATIONAL KOREA MARITIME & OCEAN UNIVERSITY

Made by Minho Park (Ph.D.)
https://orcid.org/0000-0002-6900-4566

Introduction to part-time lecturer (Minho Park)

EDUCATION

2014: B.A., Marine system engineering, National Korea Maritime and Ocean University, Busan

2023: M.S., Marine engineering, National Korea Maritime and Ocean University, Busan

2025: Ph.D., Marine engineering, National Korea Maritime and Ocean University, Busan

POSITIONS

2012: Marine engineer (Final position: Apprentice engineer), Hanjin Shipping

2014-2018: Marine engineer (Final position: 2nd engineer officer), H-Line Shipping

2019-2020: Marine engineer (Final position: 1st engineer officer), G-marine service

2021-2025: Researcher, National Korea Maritime and Ocean University

2025-date: Postdoctoral Fellow (BK21 Four), National Korea Maritime and Ocean University

How classes are run

Classes will be mainly operated with PowerPoint files.

Textbook is just for reference (not mandatory).

PPT files are mostly written in English.

(I am not native English speaker, so the grammar is not perfect.)

15 weeks course, so 13 PPT files are prepared. (Excluding midterm and final exams)

Why are the course materials in English?

1) Most of the students here end up working as marine engineers on ships.

2) As a marine engineer, you will operate and maintain several machinery.

3) Every ship has an instruction book (manual) for each machinery.

4) Most of the machinery on the ship are foreign products, not domestic (S. Korea) ones, so instruction books are in English.

5) To understand (operation and maintenance) each machinery, you must read instruction books.

6) When you get a job, you will be taught using the company's training materials. These training materials are either copied from parts of the instruction books or are based on the instruction books.

7) Therefore, English is important, and through lectures, you will learn in advance the terminology used in internal combustion engines.

8) Moreover, to work with foreign crew members, you must be able to speak English and know the terminology used in each machinery.

9) Reading materials in English can indirectly improve your TOEIC reading skills.

Lesson content for each week

Ch0_Introduction to the Class

Ch1_Overview of the Internal Combustion Engine

Ch2_Thermodynamics and Compressed Air System

Ch3_Marine Fuels and Internal Fuel Oil System

Ch4_Intake and Exhaust System

Ch5_Turbocharger

Midterm

Ch6_Piston Fittings and Crankshaft

Ch7_Lube Oil System

Ch8_Cooling Water System

Ch9_Introduction to the Main Engine

Ch10_Alternative Fuels and Alternative Fuel Systems

Ch11_Environmental Regulations and Exhaust Gas Aftertreatment Systems

Ch12_Tools, Apprentice Engineer Duties, and Career Direction

Final Exam

Grading method for this class

1) Midterm exam: 45%
2) Final exam: 45%
3) Attendance: 10%

All course materials have been uploaded to GitHub, so please download them.

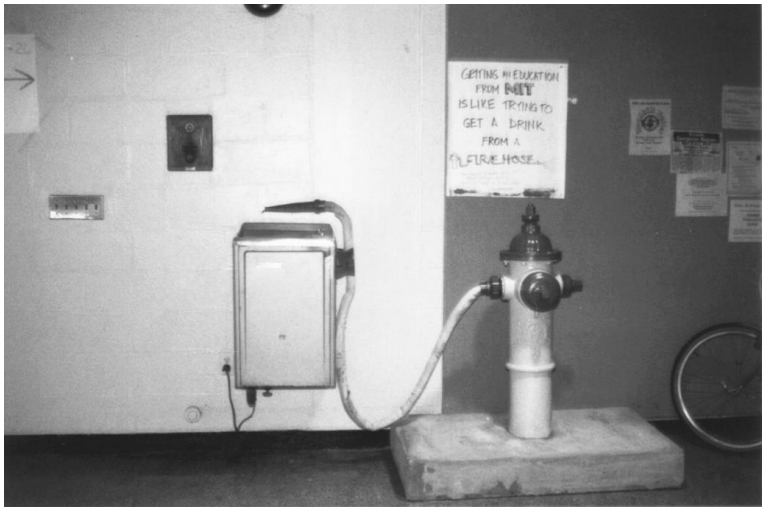
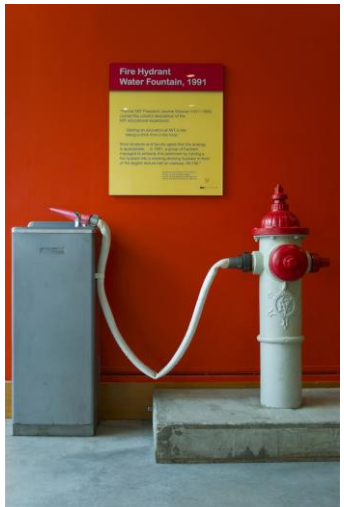
Motivation

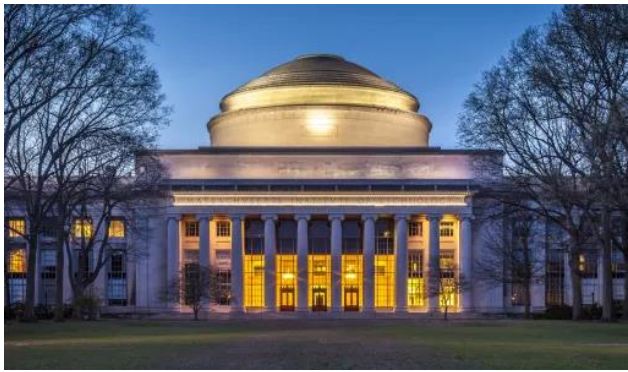
What getting an education from MIT is like?

(1915-1994)

The famous quote widely attribute to former MIT President Jerome Wiesner: “Getting an education from MIT is like taking a drink from a firehose.”







국립한국해양대학교
NATIONAL KOREA MARITIME & OCEAN UNIVERSITY
